27 Acknowledgements

28 Thanks to E. Collie for suggesting improvements to the manuscript. Initial data compilations from EU  
29 waters were conducted as part of the EU Network of Excellence MarBEF (Marine Biodiversity and  
30 Ecosystem Functioning; contract number GOCE-CT-2003-505446), and supported by the Center for  
31 Macroecology, Evolution and Climate (Danish National Research Foundation). The first author was  
32 supported by the EU FP7-KBBE project VECTORS (project ID: 266445).

33

34 Biosketch

35 Henrik Gislason is professor emeritus in fisheries ecology and interested in fish community models,  
36 species interaction, fish life history theory, marine biodiversity, and the impacts of fishing on marine  
37 ecosystems.

38

39 Keywords: marine fish, biodiversity, species size, temperature, density, abundance.
